

Aqueos maintains a strategic West Coast location to serve our client's needs. Our Ventura, California, facility is located near the deep water Port of Hueneme. This facility includes:

- Multiple Air and Gas Diving Systems
- Multiple Remotely Operated Vehicle (ROV) Systems
- Local Divers with Extensive West Coast Experience
- Extensive Local Networks of Survey, Vessel, Engineering and Manufacturing Services for
- Full Service Support
- Quick and Efficient Mobilization for Rapid Response
- Enclosed Shop and Office
- Complete Fabrication Facilities

Aqueos has been serving the West Coast since our inception in 2000. In 2005, Aqueos expanded with self-sustaining office and shop facilities to support our Gulf of Mexico operations. With our expansion, Aqueos is now available to support projects throughout the United States and Central America.

Our Gulf of Mexico office and West Coast office, coupled with the diverse business expertise of our management and experienced field teams enable us to efficiently and effectively service our offshore and inland customers in all parts of North America, including the greater Pacific Region, from Alaska to Central America and the Gulf of Mexico, on a year-round basis.

At Aqueos, our mission is simple — to provide our customers superior contracting services through experience, innovation, field-proven equipment, exceptional safety standards and state-of-the-art techniques.
